Shoreline bank area that is stabled and buffered by emergent aquatics and good bank growth.

Weed rolling provides an inexpensive method of controlling weeds in a small area particularly around docks and adjacent open water, however they may disturb some bottom dwelling animals and may interfere with fish spawning. Weed rolling may also cause plant fragmentation, which could increase the spread of some invasive weeds.

Aquatic plants provide an underwater forest of habitat promoting healthy balanced aquatic eco-systems.

FUTURE GENERATIONS  
MINNESOTA'S RICH LEGACY OF  
FISHING.**

**IT IS OUR VISION THAT  
OUR COALITION CAN  
PUT MORE OARS IN THE  
WATER FOR HABITAT.**

A well managed shoreline with access for boating, a small beach and preservation of native aquatic plants.
